Flood situation report

Area: Beas flood, Mandi and Kullu, Himachal, 9 Jul 2023 | Event date: 9 July 2023 | Latest radar image: 16 July 2023

1. Where it flooded

The radar shows 160 ha (1.60 km²) flooded or buried by debris. F010 F011

Of this, 35 ha is open water and 125 ha is debris or scour. F012 F014

The radar could not see 2,113 ha because of terrain shadow, so conditions there are unknown. F016

2. What was hit

Buildings: 0 likely destroyed and 0 possibly damaged, out of 131 mapped. F025 F021 F022

Roads: 18.8 km likely destroyed and 14.2 km possibly damaged, out of 1,449.0 km mapped. F038 F034 F035

Bridges: 3 likely destroyed (New Victoria Bridge, Pandoh Sivabadhar Road) and 0 possibly damaged, out of 76 mapped. F031 F027 F028 F033

3. Who is cut off

95 of 843 settlements are likely cut off by road. F042 F041

Among them: Bonsh, Dhamun, Dyori, Hatun, Kachhni. F046

The nearest health facility for 95 of the cut-off settlements is Bbmb Hospital. F047 F048

OpenStreetMap lists 55 health facilities in the area. Hospitals among them: 29. F5375 F5376

Repair priority

1. Reopening unnamed unclassified (road) reconnects 81 settlements. F5378 F5379 F5381
2. Reopening unnamed trunk (road) reconnects 19 settlements. F5383 F5384 F5386
3. Reopening Pandoh Sivabadhar Road bridge (bridge) reconnects 14 settlements. F5388 F5389 F5392

Method

Sentinel-1 radar images from before and after the event are compared to map new water and debris. Pre-event OpenStreetMap roads, bridges and buildings are overlaid, and a road network model finds settlements that can no longer reach a health facility.

Educational prototype, not an operational tool. Numbers come from satellite analysis and have not been checked on the ground.

Grey codes such as F012 point to entries in facts.json.
